Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-15 and 21-31 drawn to a process.

Group II, claims 16-20, drawn to a plant.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, a special technical feature which these claims share does not define a contribution over the prior art. For example, the claims of Groups I and II share a source of magnesium ions as the special technical feature, which is considered to lack novelty or an inventive step in view of Stendahl et al. 5,720,882 (see col. 3 line 16 through col. 4 line 63).

A telephone call was made to Charles B. Rodman on 4/3/08 but did not result in an election.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
